

NAVIN CHAUDHARI

PHP LARAVEL DEVELOPER

ABOUT ME

I'm a passionate **Full Stack** developer specializing in the **Laravel** framework. With hands-on experience in building scalable web applications, REST APIs, and backend systems, I bring clean code, performance, and security best practices to every project. I enjoy solving complex problems, working with databases, and integrating third-party services.

PROJECTS

Hospital Management System

Developed a hospital management web app using **PHP** with user roles. The app includes a Appointment page, Service page, and Doctor information page. Users can view information, while the admin can manage Doctor and patient data.
